

## Family wellbeing in Marlborough and Nelson

FEBRUARY 2017

### The focus

This *At A Glance* looks at families in Marlborough and Nelson and how they're faring. The information used in this publication has been drawn from our *Families and Whānau Status Report 2016*, which aims to measure, monitor and understand family wellbeing in New Zealand. We are sharing this information to help policymakers and community leaders make more informed decisions about the work they do with families and whānau in Marlborough and Nelson.

We see families as the key **building blocks** of our society. They give each of us a sense of identity and belonging. The core functions of a family are to:

CARE, NURTURE AND SUPPORT

MANAGE RESOURCES

PROVIDE SOCIALISATION AND GUIDANCE

PROVIDE IDENTITY AND A SENSE OF BELONGING.

### About *At a Glance*

Superu's *At a Glance* series uses infographics to illustrate research findings or key information about a priority topic.

### Did you know...

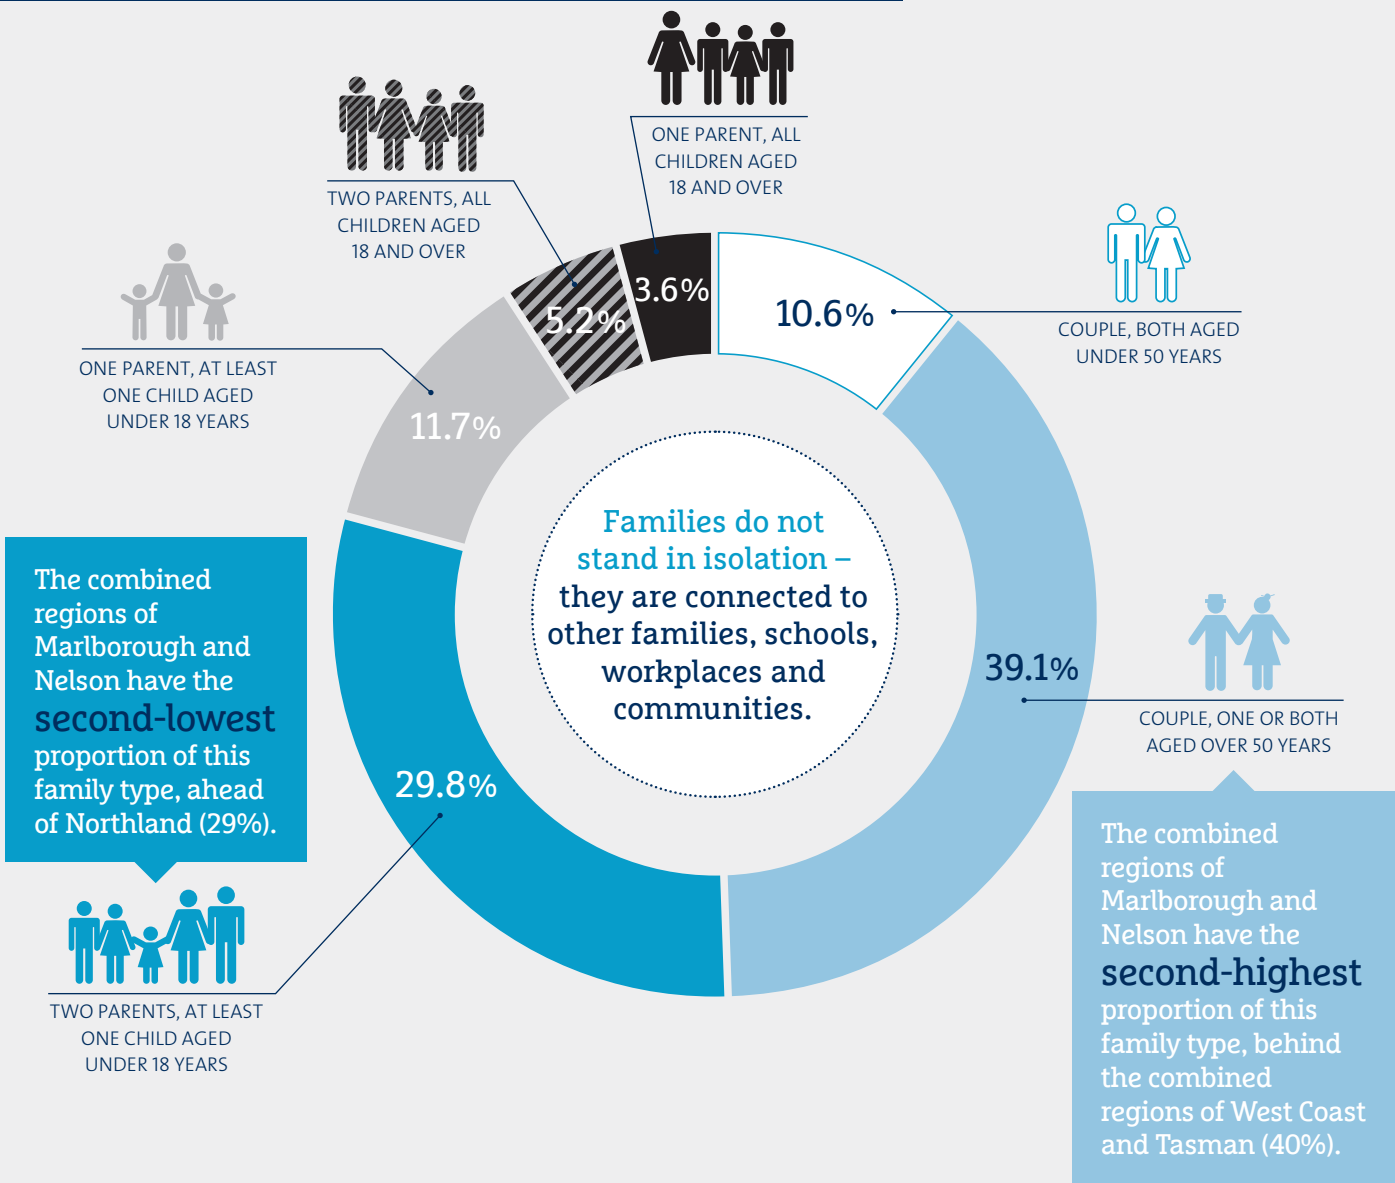

that there are **well over a million** families in New Zealand?

In Marlborough and Nelson, there were **25,419** families at last count.

### Marlborough and Nelson families: A snapshot

Families in Marlborough and Nelson did not vary greatly from the average New Zealand family. Along with most family members across the rest of New Zealand, they were likely to report being treated fairly, feeling safe at home and work, and having easy access to services. However, families in Marlborough and Nelson were the most likely in the country to report adequate income and they were the least likely to have a smoker in the family. There were also some differences across a few family types. For example, couples under 50 were less likely to live in well-off areas than other couples of the same age across New Zealand. Further, members from single-parent families with young children felt like they were able to express their identity more easily, suggesting perhaps that those who live in the region are more accepting of people's differences.

# Family types in Marlborough and Nelson

Source: Census of Population and Dwellings 2013.

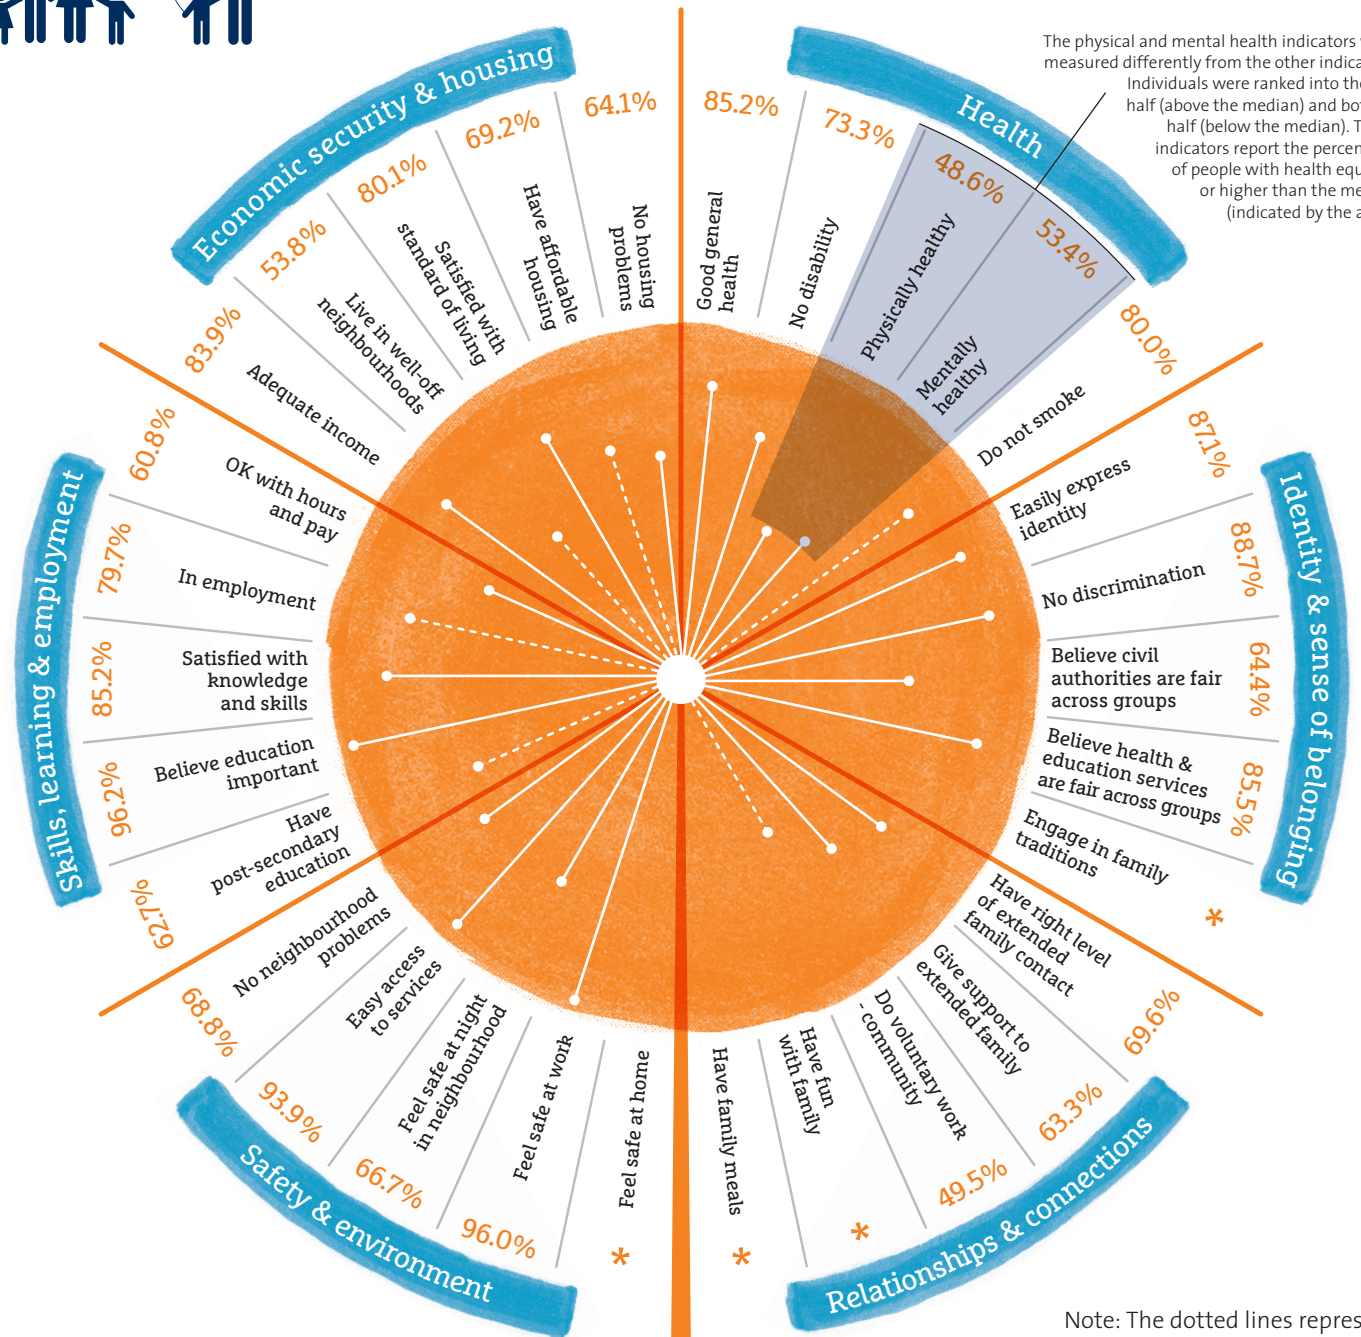

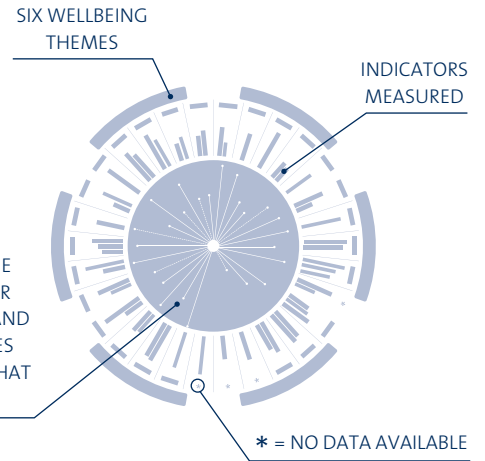

# Family ethnicity

Ethnicity is based on **at least one family member identifying with that group.** This means that a family can be represented in more than one ethnic grouping.

# How are Marlborough and Nelson families faring?

We assess wellbeing against **six broad themes** that influence and contribute to a family's ability to function. We also take into account different 'indicators' under each theme. This diagram provides a snapshot of Marlborough and Nelson families according to these specific indicators.

The physical and mental health indicators were measured differently from the other indicators. Individuals were ranked into the top half (above the median) and bottom half (below the median). These indicators report the percentage of people with health equal to or higher than the median (indicated by the arch).

Note: The dotted lines represent individuals and the solid lines represent families. These differ because data was drawn from different sources

Source: General Social Survey data from 2008, 2010 and 2012.

## Summary table

How do Marlborough and Nelson families **compare to national averages\*** on indicators such as housing, health, safety and skills?

### Key

Below national average	
Above national average	
Combination (above and below national average)	
Same as national average	

	 Economic security and housing	 Health	 Identity and sense of belonging	 Relations and connections	 Safety	 Skills
 COUPLE, BOTH AGED UNDER 50 YEARS	Less likely to live in well-off areas					
 COUPLE, ONE OR BOTH AGED OVER 50 YEARS					Less likely to have problems with neighbours	
 TWO PARENTS, AT LEAST ONE CHILD AGED UNDER 18 YEARS				More likely to do voluntary work		
 ONE PARENT, AT LEAST ONE CHILD AGED UNDER 18 YEARS			More likely to feel that they can express their identity			
 TWO PARENTS, ALL CHILDREN AGED 18 AND OVER						

\* Each regional family type is compared with the national averages for the same family type. For example, younger couples (both partners under 50 years of age) in the combined regions of Marlborough and Nelson are less likely to live in well-off neighbourhoods than other younger couples across New Zealand.

For more detailed figures and information about how Marlborough and Nelson and other regional families fared against the national average, please see [www.superu.govt.nz/families\\_whanau\\_supplementary\\_data\\_2016](http://www.superu.govt.nz/families_whanau_supplementary_data_2016)

# Family wellbeing framework

The Family Wellbeing Framework identifies **four core family functions** and shows how they contribute to wellbeing. The Framework shows just how complex families are, and that there are many factors that influence their ability to fulfil their core functions.

## Our purpose

To increase the use of evidence by people across the social sector so that they can make better decisions – about funding, policies or services – to improve the lives of New Zealanders, New Zealand’s communities, families and whānau.

## What we do

We work across the wider social sector to:

- **promote** informed debate on key social issues for New Zealand, its families and whānau, and increase awareness about what works
- **grow** the quality, relevance and quantity of the evidence base in priority areas
- **facilitate** the use of evidence by sharing it and supporting its use in decision-making.

### About the Families and Whānau Status Reports

Each year since 2013, we have produced an annual families status report that measures and monitors the wellbeing of New Zealand families and whānau. This requirement was introduced by the Families Commission Amendment Act 2014, and we are proud to undertake this work.

The general aim of the Families and Whānau Wellbeing Research Programme is to increase the evidence about family and whānau wellbeing. Our research aims to better understand how families and whānau are faring, and the key role they play in society. This is so that decision-makers in the social sector make informed decisions about social policies and programmes and better understand what works, when and for whom.
