

Family wellbeing in Otago

FEBRUARY 2017

The focus

This *At A Glance* looks at families in Otago and how they're faring. The information used in this publication has been drawn from our *Families and Whānau Status Report 2016*, which aims to measure, monitor and understand family wellbeing in New Zealand. We are sharing this information to help policymakers and community leaders make more informed decisions about the work they do with families and whānau in Otago.

We see families as the key **building blocks** of our society. They give each of us a sense of identity and belonging. The core functions of a family are to:

CARE, NURTURE AND SUPPORT

MANAGE RESOURCES

PROVIDE SOCIALISATION AND GUIDANCE

PROVIDE IDENTITY AND A SENSE OF BELONGING.

About *At a Glance*

Superu's *At a Glance* series uses infographics to illustrate research findings or key information about a priority topic.

Did you know...

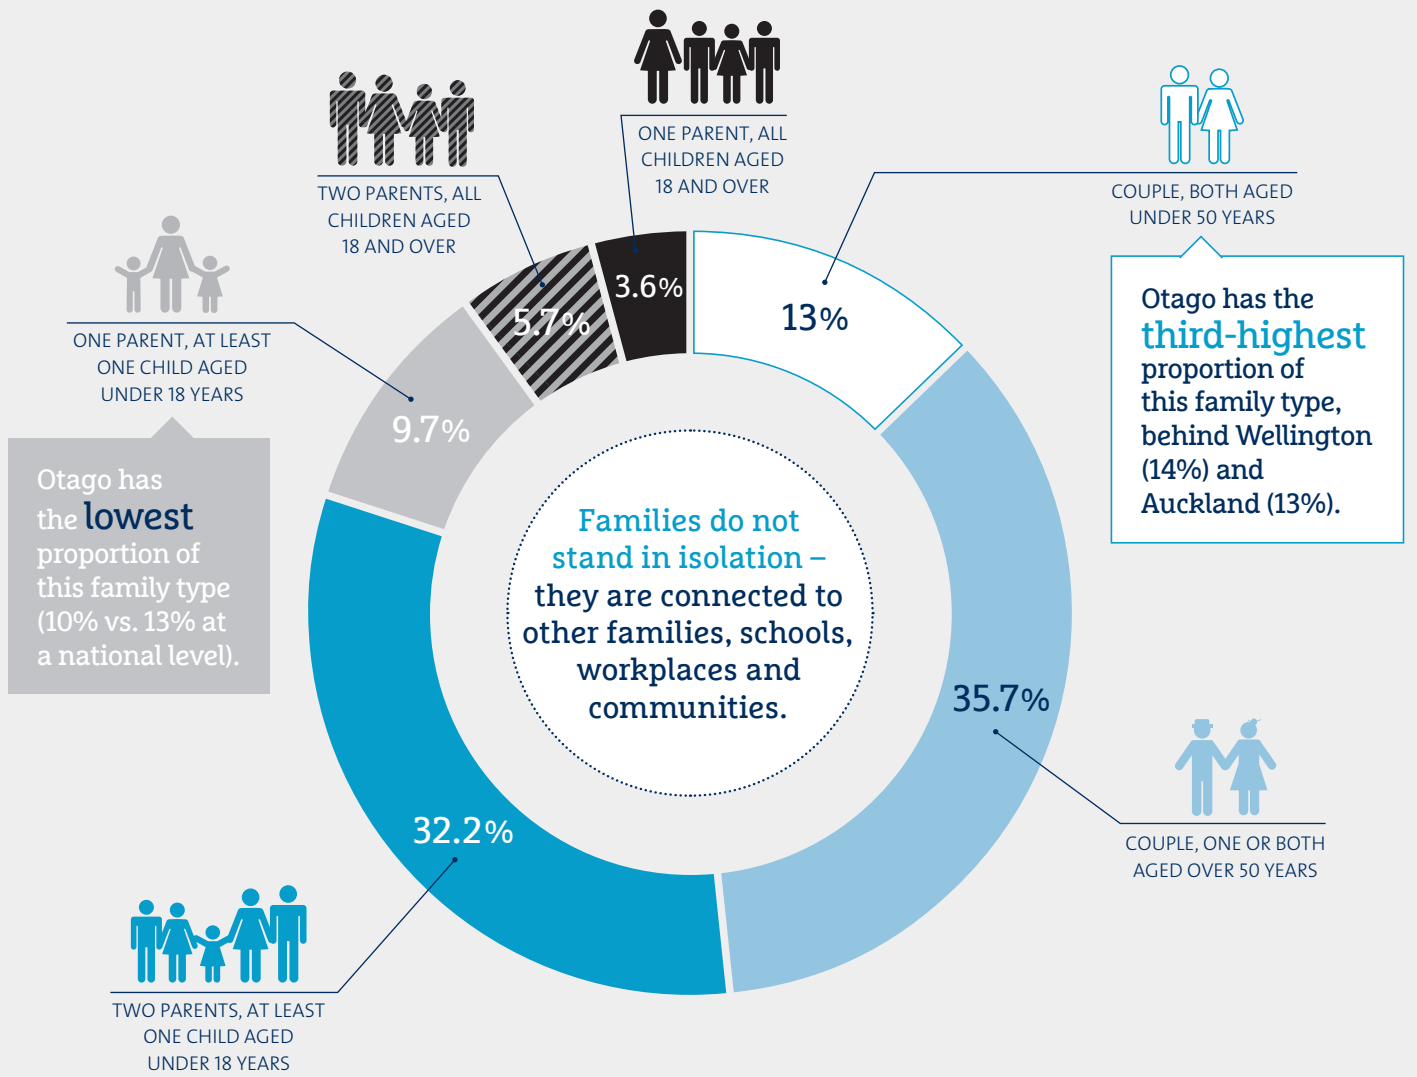

that there are **well over a million** families in New Zealand?

And in Otago, there were **52,497** families at last count.

Otago families: A snapshot

Families in Otago present a good picture of wellbeing, based on the indicators we measured such as housing, employment and safety. For example, Otago families were more likely than almost all other regions to live in well-off areas and they were more likely to have affordable housing, but they were also the most likely to report housing problems. Members of Otago families were the most likely to feel safe walking at night in their neighbourhoods, and they were also the most likely to feel they couldn't express their identity. In general, Otago family members – along with most of those in the rest of New Zealand – were likely to report being treated fairly and have easy access to services.

Family types in Otago

Family ethnicity

Ethnicity is based on **at least one family member identifying with that group.** This means that a family can be represented in more than one ethnic grouping.

Summary table

We assess wellbeing against **six broad themes** that influence and contribute to a family's ability to function. We also take into account different 'indicators' under each theme. This diagram provides a snapshot of of Otago families according to these specific indicators.

The physical and mental health indicators were measured differently from the other indicators. Individuals were ranked into the top half (above the median) and bottom half (below the median). These indicators report the percentage of people with health equal to or higher than the median (indicated by the arch).

Note: The dotted lines represent individuals and the solid lines represent families. These differ because data was drawn from different sources

Source: General Social Survey data from 2008, 2010 and 2012.

Otago scorecard

How do Otago families **compare to national averages*** on indicators such as housing, health, safety and skills?

Key

| | |
|--|--|
| Below national average | |
| Above national average | |
| Combination (above and below national average) | |
| Same as national average | |

| |  Economic security and housing |  Health |  Identity and sense of belonging |  Relations and connections |  Safety |  Skills |
|--|--|---|--|---|---|---|
|  COUPLE, BOTH AGED UNDER 50 YEARS | More likely to live in well-off areas | | | | | |
|  COUPLE, ONE OR BOTH AGED OVER 50 YEARS | More likely to live in well-off areas AND have affordable housing | | | More likely to have the right level of contact with their extended family | More likely to feel safe at night | |
|  TWO PARENTS, AT LEAST ONE CHILD AGED UNDER 18 YEARS | More likely to live in well-off areas AND have affordable housing | | | More likely to do voluntary work | More likely to feel safe at night | |
|  ONE PARENT, AT LEAST ONE CHILD AGED UNDER 18 YEARS | | | | Less likely to have fun with their families | More likely to feel safe at night | |
|  TWO PARENTS, ALL CHILDREN AGED 18 AND OVER | More likely to live in well-off areas | | | | | More likely to be satisfied with their knowledge and skills |

* Each regional family type is compared with the national averages for the same family type. For example, younger couples (both partners under 50 years of age) in Otago are more likely to live in well-off neighbourhoods than other younger couples across New Zealand.

For more detailed figures and information about how Otago and other regional families fared against the national average, please see www.superu.govt.nz/families_whanau_supplementary_data_2016

Family wellbeing framework

The Family Wellbeing Framework identifies **four core family functions** and shows how they contribute to wellbeing. The Framework shows just how complex families are, and that there are many factors that influence their ability to fulfil their core functions.

Our purpose

To increase the use of evidence by people across the social sector so that they can make better decisions – about funding, policies or services – to improve the lives of New Zealanders, New Zealand’s communities, families and whānau.

What we do

We work across the wider social sector to:

- **promote** informed debate on key social issues for New Zealand, its families and whānau, and increase awareness about what works
- **grow** the quality, relevance and quantity of the evidence base in priority areas
- **facilitate** the use of evidence by sharing it and supporting its use in decision-making.

About the Families and Whānau Status Reports

Each year since 2013, we have produced an annual families status report that measures and monitors the wellbeing of New Zealand families and whānau. This requirement was introduced by the Families Commission Amendment Act 2014, and we are proud to undertake this work.

The general aim of the Families and Whānau Wellbeing Research Programme is to increase the evidence about family and whānau wellbeing. Our research aims to better understand how families and whānau are faring, and the key role they play in society. This is so that decision-makers in the social sector make informed decisions about social policies and programmes and better understand what works, when and for whom.
